1) Job Scope :

- Documentation
- Testing
- Bug Reporting

2) Technology used :

- Bitbucket (Github)

3)Benefits of software degree in QA Testing Analyst

Help to design test cases that thoroughly cover software functionality and help in outomated testing process.

SKILLS

- Skills :
- Analyze
- Creative
- Communication
- Search Proficiency
- Time management
- Documentation Skills
- Attention to details
- Problem solving
- Creative thinking

REFLECTION

The Clarity Techworks industry talk provided valuable insights into career paths in fintech, covering four key roles: Developer, UI/UX Designer, QA Testing Analyst, and Web/API Developer. The speakers explained each role's responsibilities and tools, like VS Code, Jira, and Firebase Console, helping clarify the skills needed for success. They emphasized the importance of embracing failure, staying adaptable, and continuously learning through platforms like GitHub and online certifications. Overall, the talk expanded our understanding of career opportunities in tech and inspired me to enhance my skills and resilience.

SUMMARY

- Clarity Techworks is a fintech company, creator of Rapidz pay

Development :

Using lalavel, Vue and Inertia

3) Skills

- Programming Languages
- Explore more
- Responsive Design
- Testing and Debuging
- Collaboration and Communication

WORK-LIFE VS STUDIES LIFE

• Work- life :

The work is more practical, has limited time for task, need to learn by ourselves, dealing with stress and pressure but will stabil in finance, opportunities for growth

• Studies-Life :

The study is more theoretical, have someone to teach us, managing time effectively, dealing with academic challenge.

Advice:

- Keep practice and learn
- Start developing software and publishing it to Github
- Make connection
- Build a strong foundation
- Start small
- Be persistent
